

Europe, Love Is Not The Enemy

Glowing on the outside
Coming by the moonlight
Looking at this blue thing
Falling by the waste time

The years keep on calling
Riding on a moonbeam
Having on a daydream

Crash the barricades, raise the alarm
We've forgotten how to feel
Break the silence, shout it out
Call the angels there's a friend in need
Love is not the enemy
Love is not the enemy

Looking at the bright side
Walking in the sunshine
Loving this blue thing
Want it in my life

The years keep on calling
Headed for Venus
No sign of life

Crash the barricades, dont be afraid
We've forgotten how to feel
Break the silence, shout it out
Call the angels there's a friend in need
Love is not the enemy
Love is not the enemy

Oh, can you feel it, does anybody care
Oh, do you need it, say a little prayer
Oh, can you feel it, does anybody care
Oh, do you need it, say a little prayer

Crash the barricades, raise the alarm
We've forgotten how to feel
Break the silence, shout it out
Call the angels there's a friend in need
Love is not the enemy
Love is not the enemy

Oh, can you feel it, does anybody care
Oh, do you need it, say a little prayer
Oh, can you feel it, does anybody care
Oh, do you need it, say a little prayer
