## Europe, Love Is Not The Enemy

Glowing on the outside Coming by the moonlight Looking at this blue thing Falling by the waste time

The years keep on calling Riding on a moonbeam Having on a daydream

Crash the barricades, raise the alarm We've forgotten how to feel Break the silence, shout it out Call the angels there's a friend in need Love is not the enemy Love is not the enemy

Looking at the bright side Walking in the sunshine Loving this blue thing Want it in my life

The years keep on calling Headed for Venus No sign of life

Crash the barricades, dont be afraid We've forgotten how to feel Break the silence, shout it out Call the angels there's a friend in need Love is not the enemy Love is not the enemy

Oh, can you feel it, does anybody care Oh, do you need it, say a little prayer Oh, can you feel it, does anybody care Oh, do you need it, say a little prayer

Crash the barricades, raise the alarm We've forgotten how to feel Break the silence, shout it out Call the angels there's a friend in need Love is not the enemy Love is not the enemy

Oh, can you feel it, does anybody care Oh, do you need it, say a little prayer Oh, can you feel it, does anybody care Oh, do you need it, say a little prayer
