

# Eva Cassidy, Stay

You look me in the eye  
And I see the sorrow  
A thousand days have passed away  
You wonder how I feel  
Love dangle in your eye  
But it's never been fulfilled

Stay with me don't walk away  
Don't leave me standing alone  
With my future growing cold  
Oh stay with me stay

I stare into the night  
Thinking of the times we had  
Never know just how you feel  
I wondered if you cared for me  
Hearts always side by side  
But never quite together

Stay with me don't walk away  
No don't leave me standing alone  
With my future growing cold  
Oh stay with me stay

Stay with me don't walk away  
No don't leave me standing alone  
With my future growing cold  
Oh stay with me

Don't walk away  
No don't leave me standing alone  
With my future growing cold  
Oh stay with me

Don't walk away  
No stay with me stay
