

# Evan & Jaron, Outerspace

It's lonely here in outerspace  
The nearest stars are miles away  
But I believe I'm on to something big

I've only come to not be found  
To circle high above the ground  
And watch everyone else for a change

Don't you ever wish you'd never  
Don't you wonder if your face might shine  
Without the pies of lies

To all the girls who wish to be  
Immortalized in fantasy  
I wrote this song for you and not for me

I'm the senator of a lonely state

Too far gone I've sealed my fate  
I'm so tired of being blown out with the cause

Don't you ever wish you'd met her  
Don't you wonder if your face might shine  
Without the pies of lies

I've arrived  
I'm doing well  
Quite a view from the top  
Though it is cold as hell  
I've arrived  
And it's hard to tell  
The bright lights from the starlights  
And the canyons from the hills
