

Everclear, The New Disease

I heard the news today
All about your new disease
This is what you said you wanted
When you walked away from me

I heard the news today
Yeah i know what your friends all say
That I'm gonna go to hell
They're all probably right
I just wanna go to hell my way
I just wanna do it my way

I heard the news today
All about your new romance
There is always gonna be someone better than me
I guess i never had a chance
Yes i heard the news today
You were livin' by the sound of the bell
I still believe that life gets better
When you tell the world to go to hell

Oh I don't wanna play your game
I don't wanna live that way
I don't wanna do what you tell me to do
I don't fit inside the box you've made

No I don't wanna play your game
No I will never live that way
I don't wanna do what you tell me to do
I just want to do it my way

Yes I heard the news today
You've got scars on your hands and knees
You never would have been so obvious
When I was a new disease
Yes I heard the news today
You were livin' by the sound of a bell
I still believe that life gets better
When you tell the world to go to hell

Oh I don't wanna play your game
I don't wanna live that way
I don't wanna do what you tell me to do
I don't fit inside the box you've made

No I will never play your game
No I will never live that way
No I don't wanna live like you want me to live
I just want to live my way
