

Evil Superstars, Laserblack

<sing sing
got enlightened a week ago
and I already hate it
people stop sending me money from all over the world
I'm sick cuz I made it
I said no good no why hot bad
but i can't stop now
can I tell you that they've sent
a hypnotized hamster to assassin me in my sleep
I don't bother to fear or run
cuz I am a real man and that means
I have no love left to weep
oh-oh words
all sung with broken glasses in my lung
I said no good...
I been watching, waiting for a curse
but unfortunately things are not getting any worse
come on kiss with your spidertongue
oh - oh no good...
here we come high
on nightmare monster sun blue like corpse
air people stop spending me
kids from all over the world
no good...>
