

Example, Nicest Thing Remix Kate Nash

[Example:]

Can I remix you?

[Kate Nash:]

No

[Example:]

Do you know what it will do for my career?

[Kate Nash:]

You know what it will do for mine?

[Verse 1:]

Face-to-face it's perfect

You smile but you like a little nervous

I was late but now it feels worth it

On the surface you're flawless

Textbook gorgeous

You're just sitting there, dunno where to look

Face up at me I stare down at your book

Every now and then I rise me for a second

Checking one another then pretend that we're not

You look down so I look away too

Face in the glass a reflection of you

Struggle not to care that you're there

But I stare and you're playing with your hair

Keep fiddling about with your iPod

My gosh, oh my god you're fit

The nicest thing I've seen

You rub your cheek then you just went and touched those lips

I really wanna be those fingertips

[Chorus:]

All I know is that you're so nice,

You're the nicest thing I've seen.

I wish that we could give it a go,

See if we could be something.

[Verse 2:]

I start asking myself questions

I wonder what is your favourite restaurant

I wonder if you go to the gym, looks likely

Who's your idol? Sienna or Knightly?

Hope you like rap and not rock

I hope you don't buy crap when you shop

But I should stop getting carried away

I don't even know you

But still I want to lift you and carry you away

Haven't even spoken this is all from a look

I better stand the nonsense written in your book

Every time I look at your face it gets cuter

I feel like I suit ya and you suit me

Down to the ground

Bizarre and profound

The nicest thing I ever could have found

You stroke your hair then you just went and touched those lips

I really wanna be those fingertips

[Chorus:]

All I know is that you're so nice,

You're the nicest thing I've seen.

I wish that we could give it a go,

See if we could be something.

[Verse 3:]

I can sit here gazing

You look amazing

Cute little nose and the patter on your clothes
Doesn't matter where it goes
I can sit here all day
Say, whatever we'll do it your way
El snap out of it stop dreaming
I'm leaving, coming to my stop don't believe it
It's more memorable if we leave it
Don't speak, so nice so I tell here with my eyes
Tell her what I think it's my last chance
What I said with that last glance, I meant it
Journeys ended, step on to the platform
Doors close shut, it's over but
Take one last short look
Through that window
Then go back to reality
You move away then you just went and touched those lips
But I'm never gonna be those fingertips

[Chorus:]

All I know is that you're so nice,
You're the nicest thing I've seen.
I wish that we could give it a go,
See if we could be something.
