

Exilia, Lifegame

Nobody's waiting for you
get nothing for nothing
pay the
price and learn
from your mistakes
Insert your coin
you gotta play
the life game
a million mother fuckers waiting for the next sucker

Load
and reload
don't get nothing for love
life is a lesson. Make the
revolution turn

you go round and around. you go round you go

farther, cause everything is money
but you know how to get away
never forget your true colors
true colors light your way

Nobody cares about you
slave to the system
in a plastic existence
greed that you don't need

Insert your coin
you gotta play the life game
a million
mother fuckers waiting for the next sucker

Load and reload
you know
money talks
learn your lesson. Save your mind and save your soul
you go round and around, and around you go

farther, cause everything is money
but you know how to get away
never forget your true colors
true colors light your way

You gotta play the life,
you gotta play the life game (x3)

farther, cause everything is money
and you know how to get away
never forget your true colors
true colors light your way

everything is money
and your heart needs another place
never forget your true colors
true colors light your way
true colors light your way
