

# Expatriate, Shooting Star

Save my heart  
For all of time  
If you're going to open up  
Well come and pay the price  
And take this love  
Take it to the streets  
Burn down everything  
Til you see it all complete

My body it moves  
Like a shooting star  
My body it moves  
Like a shooting star

Underneath the stars  
They were fading into life  
Love was full of slaughter  
We moved out of the night

My body it moves  
Like a shooting star  
My body it moves  
Like a shooting star  
My body it moves  
Like a shooting star  
My body it moves  
Like a shooting star  
Star, star, star
