

Exploited, About To Die

See these missiles in the air
See these missiles in the air
All these missiles just for you
Pointed at me, pointed at you
Youre about to die
Dont ask me why
Wave bye bye
Dead
Parents take your children below
Parents take your children below
Is this what you planned for them
In four minutes time theyll be dead
Just figures in government games
Just figures in government games
Youre to blame, youre to blame
Was your vote that put them here
Why do children look to the sky
Watching death come from above
All those missiles just for us
Pointed at me pointed at you
