f(x), Red Light

Aye aye aye aye wait a minute
Under the rule of the jungle
The weak gets devoured

Just push ahead,
Yeah push ahead
Oops, I got stepped on

Aye aye it's a red light light
I don't even know what's wrong with the current situation

Aye aye it's a red light light
Listen carefully to the whoever is trying to warn us
Red light

Try to breathe for a moment
Try breathing, try breathing Eh eh oh
This isn't war

Open your eyes wide
Stop the collision from happening
(You're going to be a witness to change)
In front of that caterpillar that got pushed around
(When everything sinks)

It's turned on, red light
The vivid, red light
It gets bigger by itself
That red light

Boy
Your best excuse is just filled with doubt to me

Maybe it's love
A very slow wave
A very slow wave

Aye aye it's a red light light
Let's find it for each other using light
That special emergency exit

Aye aye think about it
Why something made us stop
Red light

Turn around again, eh oh
Try to fnd what's important

Open your eyes wide
Stop the collision from happening
(You're going to be a witness to change)
In front of that caterpillar that got pushed around
(When everything sinks)

It's turned on, red light
The vivid, red light
It gets bigger by itself
That red light

It's taken too long for this miracle to come
But we wait for the blue light, we want it

Stop the flood (This is reality, listen to my voice)
Open your eyes wide (Look at the world in front of you)

The one who's only been pushed (A bright light pushed you)
Caterpillar
That's madness

It's turned on, red light
The vivid, red light
It gets bigger by itself
That red light
