## Face Down, Superiority Blanket

You feel the need To draw your lines in your box of sand Condescend on me Just who are you supposed to be There's no one out there as f\*\*ked as you The worst of our kind think the way that you do Your thoughts on equality are nothing new You think you're better than me that makes me better than you The promise of your lies Don't bite the apple and the serpent dies Your faade full of holes And I see through them all In my eyes I can only see What makes you think you're superior And you hide In my eyes I can only see There is no blood upon your hands
