

# Faith Hill, Like We Never Loved At All

You never looked so good  
As you did last night  
Underneath the city lights  
There walking with your friend  
Laughing at the moon  
I swear you looked right through me  
But I'm still living with your goodbye  
And you're just going on with your life

[Chorus:]  
How can you just walk on by  
Without one tear in your eye?  
Don't you have the slightest feelings left for me?  
Maybe that's just your way  
Of dealing with the pain  
Forgetting everything between our rise and fall  
Like we never loved at all

You, I hear you're doing fine  
Seems like you're doing well  
As far as I can tell  
Time is leaving us behind  
Another week has passed  
And still I haven't laughed yet  
So tell me what your secret is?  
To letting go, letting go like you did, like you did

[Chorus]  
Did you forget the magic?  
Did you forget the passion?  
Did you ever miss me  
Ever long to kiss me?

Maybe that's just your way  
Of dealing with the pain  
Forgetting everything between our rise and fall  
Like we never loved at all

You, you never looked so good
