

# Faith Or Fear, Time Bomb

Demented individuals, children of remorse  
Lashing out destruction, terror takes its course  
Slay their mortal innocence, for they stand in the way  
What cannot wait 'til tomorrow will be destroyed today

[Chorus:]

Time bomb, ticking in your face  
Make a sudden move, and watch it blow apart the place  
Time bomb, deadly from the start  
Believe that the intention is to blow this place apart

Spread the fear, upon other nations  
Threatening, increasing frustrations  
Acting out of cowardice, it's the only way they can  
Explosives give them power, taking lives of other men

[Chorus]

Who will bear the cross  
Careless sense of loss  
All life crushed to dust  
Killing fills their lust  
Hatred clouds their eyes  
Rancid death loud cries

Total annihilation, never ending death  
Crushing helpless people, smothering last breaths  
Taking lives not given, as if they had control  
They're the ones who will decay in Hell's eternal hole  
We're given equal power, which we should not abuse  
Their self-destructive hatred shall cause the world to lose
