

Fallacy, No One Learned

(J. Hall/D. Tretola)

The privilege has been given too much
To forgive and forget for all you've done
Now you have a label on yourself
To show what's next to come
You get so much out of all this
Pain and misfortune to all your surroundings
You never learned to stop your troubles
Prepare to suffer for what you've done
Stand alone, in a place
And no one speaks a word
Different from other days
Everything vanished, No one learned
Why are we waiting for the end?
I know its not coming
We should leave it all
Seeing what else it could bring

(Chorus)

-(Solo)-

Things have to come now for you
Add all this pain to all this sorrow
You've got what you want now
But you'll definitely pay tomorrow!

(Chorus)
