Feeder, Anaesthetic

I'm burning out the TV tubes, It's three o'clock & amp; I'm confused Cause commitment is so complete, It's burning little holes in me I know that I might look a mess, And she's so perfect in that Oxfam dress She looks just like a beauty queen, Shinning out in velveteen I'm delirious You make it better You make the weather seem OK You're my anaesthetic You just take the pain away I love it when she comes around, She's a firework that never ends A micro chip inside my brain, I'm crawling on my knees again It scares me the way I am, I'm buried in a sea of sand Lying on a hand grenade, Waiting for the world to shake I'm delirious You make it better You make the weather seem OK You're my anaesthetic You just take the pain away You make it better You just take the pain away Delirious, I'm so delirious, delirious, I'm so delirious, Delirious You make it better You make the weather seem OK You're my anaesthetic You just take the pain awayYou make it better You make the weather seem OK You're my anaesthetic You just take the pain away Anaesthetic, She's my anaesthetic Anaesthetic,

She's my anaesthetic
