

Feeder, Oxygen

We all ferment
A face can change
But souls stay young
We're all connected
So take a journey with someone
Learn to be as one

Still living, sinking, falling, twisting,
But I'm breathing you in, breathing you in
Oxygen, Oxygen

We all ferment
A taste can change
From days so young
You feel rejected
Just hold your head up to the sun
Learn to be as one

Still living, sinking, falling, we're still living, drifting
I'm breathing you in, breathing you in
Still living, sinking, feeding, twisting, I'm living
I'm breathing you in, breathing you in

Disconnecting
Oxygen, Oxygen, Oxygen

Still living, sinking, falling, twisting
We're still living, I'm breathing you in, breathing you in
Still living, sinking, falling, drifting
We're living, I'm breathing you in, breathing you in
I'm breathing you in, breathing you
