

Feeder, So Well

20, 21, 22, 23, 24, 25, 26 still alive
It's dragging me under
Don't think I'll recover
A stone in the water
A nail in my shoulder
Just put it together
You think you're so clever
Can we make it better
Climb the mountain together

Chorus:

It's gonna break, gonna crack
Gonna fall down and smash
Paralyse, oxidise, feel us drifting apart
It's gonna break, gonna crack
Gonna fall down and smash
Paralyse, oxidise, feel us drifting apart
(don't take me down and watch me fall)

Twenty years older
The city gets colder
Still reaching for cover
We live and we suffer
Just put it together
If you think you're so clever
Can you make it better
Pull the pieces together

Chorus

40, 41, 42, 43, 44, 45, 46, still alive
It's dragging me under
Don't think I'll recover
But we'll make it better
Climb the mountain together

Chorus x2

(don't take me down and watch me fall, don't break my bones and watch me crawl)
Paralyse, oxidise, feel us drifting apart
Paralyse, oxidise, feel us drifting apart
