

# Feeder, Tell All Your Friends

Staring out to reach a star contemplating life on mars  
Life's a cover magazine I'm an eggshell under feet  
Till I see this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

New intentions all around put the brakes on slow it down  
Trying to find a new release find a space that you can breath  
But I've seen a house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

But don't come around pulling me down telling the world how I let you down  
Just tell all your friends I wanna dream with you  
So tell all your friends and neighbors too CNN BBC world news  
Tell all your friends I wanna dream with you  
Tell all your friends tell all your friends tell all your friends

I don't wanna sit here catching flies  
Cause I have seen this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun

But don't come around pulling me down telling the world how I let you down  
Just tell all your friends I wanna dream with you  
So tell all your friends and neighbors too CNN BBC world news  
Tell all your friends I wanna dream with you
