

Feeder, World Asleep

Feel like me cut away my skin
The blood on the tap washes clean
The mirror I cracked curses me
You're a little late time to leave
Live another day now I hear you scream

See what I can see
Cover me with angels wings
Breathe the air I breathe
Suffocate the world asleep

Pain in me watch as it feeds
Another day melts I feel the heat
The honey I drink nurses me
You're a little late time to leave
Live another day now I hear you scream

See what I can see
Cover me with angels wings
Breathe the air I breathe
Suffocate the world asleep

Too late I'm drifting away too late

See what I can see
Cover me with angels wings
Breathe the air I breathe
Suffocate the world asleep
