

Fergie, Won't Let You Fall

[Verse:]

I'll never let you go
So, never let me go
I will be your journey
And you will be my road
Down the stormy path
Love will never come to pass
It will be an anchor
Although the winds may blow

[Pre-Chorus:]

And through the depths of high and low
Wherever you will go, I'll follow
To the end, back again
You know

[Chorus:]

Wont let you fall
Fall out of love
Cause together well be holding on
Cause all we have is us
Wont let you go
Go away again
Because life dont mean nothing at all
If I dont have your love

[Verse:]

I will dry your tears
Take away your fears
Let me be your shelter
Your heart is safe in here
So beautiful and pure
Theres nothing I would not endure
Oh, love as got me blinded
I see it all so clear

[Pre-Chorus (1x)]

[Chorus (1x)]

[Bridge:]

Im down for you for whatever
Anything you going through
Whats mine is yours
Every little thing
I got you
Even when winds will change
Come smashing down and crashing on you

[Chorus]
