# Fetal Attraction, United States Of Shit

Discover the forgotten ruins
Hidden by the insane humanity
Look at them for what they are
Look at the liars in the eyes

Who cares about what's going on in other countries
First take a look at what we have here
The most people dying, the most people crying
The most people dead, the most books unread
And they say the US is so great

Why do we get involved in what we didn't create
Why should we even give a f**k
It's not our business, yet we always butt in
And after years of victory
There will be a battle we won't win

Who cares about what's going on in other countries
First take a lok at what we have here
The most f**king guns, the most police runs
And they say the US is so great
I'm calling bullshit
