

Fiddler's Green, On And On

Sometimes all your dreams go up in smoke
All your hope goes down the drain, it's all in vain
Things go from bad to worse
Sometimes there's a party but you're not invited

Your ideals leave you out there in the cold
They leave you high and dry and make your courage die
And then you face yourself
At least a part of you behind a dusty shelf

Then you face the enemy, then you face the enemy inside
But don't give in and don't give up
Take care! Don't let them put you in a trap

On and on, cause the road is never ending
At least we know that we are on our way
On and on, no more lies and no pretending
We're gonna find a brighter day

Stop it for a moment, hold the line
It's easy to escape when you are feeling fine
But don't give up the fight
And try to be prepared when you don't feel alright

Cause then you face the enemy, then you face the enemy inside
But don't give in and don't give up
Take care! Don't let them put you in a trap

On and on...
