

Fifteen, No Tion

It used to be that I knew exactly where I stood with you
To tell the truth it wasn't all that bad
But recently there's been change, and my whole life is rearranged
Now I wonder what the hell we had
To say it was nothing would be a lie
At least that's how it looks from where I stand
But how you feel, has been concealed
I'm falling and I don't know where I'll land
Did I mean anything to you
Did I mean anything to you, maybe not but I thought
That I meant something too
So I was A fool to spend all my time with you
Is that the way you see me now
But you won't tell me how you feel so I don't know what the deal is
Just let me know somehow
To say it was nothing would be a lie
At least that's how it looks from where I stand
But how you feel, has been concealed,
I'm falling and I don't know where I'll land
Did I mean anything to you
Did I mean anything to you, maybe not but I thought
That I meant something too
