

# Fifteen, Parking Lots

We need parking lots and we need shopping malls

Otherwise we'll die

We need more cops and more guns to keep us safe from armed gangs-

Or we'll surely die

We need cable TV to keep the kids in line

Turn off our mind-to kill some time

We need nuclear power and children with 6 eyes

We need to mutate-so the species will thrive

We need global welfare, bombs falling everywhere

And peace will come to me there when there's no one left to fight anywhere.

And god will roll down from the clouds and gosh I'll be so proud

Cuz I'll be the inner and god will take me up to heaven for dinner
