

Fight, No More Legend

There's nothing new
Since rock and roll
Everything is boring and old
No sex and drugs
No time for fun
Your stuck inside but you're still cold

There's nowhere left for you to go
Nothing left for you to say
You're just a no more legend
Living off your pay

So what to do
Now you're burned out
You just lie there on your own
No more tours
Around the world
Remembering good times all alone

There's nowhere left for you to go
Nothing left for you to say
You're just a no more legend
Living off your pay

You've been and done it all before
When you were in your glory day
You're just a no more legend
Living off your pay

You're a no more legend
No more legend yeah
Got old and aged
And lost all your pride
You're finding it hard to keep up to date
No care about life
Don't care about death
You're working yourself up into a state

There's nowhere left for you to go
Nothing left for you to say
You're just a no more legend
Living off your pay

There's nothing new
Since rock and roll
You tried to save yourself
It's too late
It's too late
