

Fightstar, We Left Tracks Of Fire

My head felt heavier than the sun.
My shoulders twisted and refused
To go much further with the burden
Of giving light from me to you.
We took the car out,
Then we parked
And we set it on fire.
We kept warm all night.
Just light it up girl
Just light it up girl
Ill fight in this war for you
I wont let you down,
I wont let you down.
Tonight.
The guns and the fire surround you,
I wont leave your side,
I wont leave your side.
Tonight.
We slept till morning,
We were tired but we took to walking
The road was hotter than the car
You turned and said to me
That theres a perfect house
On a perfect hill
You took a match from inside your bag
Just light it up girl
Just light it up girl
