

# Fingertips, Till I Get Me (To Get Free)

Don't wanna look you in the eyes and say a cold goodbye  
But I've so much to do  
I just can't stay, I can't pretend that here I've my life  
I really need to go  
Don't wanna leave without a kiss, giving you a sweet lie  
After all we've been through  
But I'm afraid you read me wrong and then you start to cry  
Sometimes you were my truth

But as you reach the end of the day  
Someone asks you to stay  
But as something's missing, something's unreal  
And you want to, you need to  
To find a way

Don't wanna make this story end without a pretty smile  
You mean so much to me  
And even if it hurts, it might hurt for a while  
I just want you to see  
That there's a chance, there's a place where I could know myself  
And get ready to be  
Someone who could come back one day and hold you really tight  
And make you happy

There's emptiness in my day  
Sadness in my night  
It's not your fault but somehow  
It doesn't feel right

There's nothing here to find  
And I need to find a way  
Something's out of sight, away  
Until you get, until you get me so  
I can get, I can get free so  
Until you get, until you get me so  
I can get, I can get me...
