

FINNEAS, A Concert Six Months From Now

Your favorite band
Is back on the road
And this fall they're playing
The Hollywood bowl
I've already purchased
Two seats for their show
I guess I'm an optimist

2011

You stole my heart here
And I couldn't listen
To that band for years
Till that night last summer
When you reappeared
Forgot how bad I wanted this

If i could see the future
I never would believe her
Falling in and out of love and falling in again
We were never any good at being friends

'When Harry met Sally'
And you feel asleep
I close your computer
And stole the top sheet
I was stuck out in Austin
For nearly a week
Anxiety like we were kids

I've been thinking too much
And it's ruined my nights
But it's hard when it isn't
To let yourself slide
And my heart doesn't slow down
When you kill the lights
I never learned to call it quits

If i could see the future
I never would believe her
Falling in and out of love and falling in again
We were never any good at being friends

I'll go Hungry and crazy and honest for you
I don't always get angry but i am promising to
If it's all that you want then it's all that i can do

Can i take you out?
To a concert six months from now?
