

Firehouse, Don't Fade On Me

Don't You Fade on Me by Firehouse

Look at our love
It's like a picture book of memories and we don't know how the story ends
When we were young
We lived each chapter of our lives and through it all
We stayed the best of friends
Darlin' turn back the pages and remember yesterday
And mark the place inside your heart
Don't close the book and let our story end this way
When times get hard oh you know I need you to be strong
Baby don't you fade on me
We've been together so long and now you're a part of me
We've been side by side through thick and thin can't throw all that away
You've got to hang on baby don't you fade on me
Take a look at us now
We've traveled every road together but we don't know where the journey's done
Just when we think we've reached the final destination
We come to find we've only just begun
Darlin' you're never lost if you just let love find the way
When times get hard and you know I need you to be strong
Baby don't you fade on me
We've been together so long and now you're a part of me
We've been side by side through thick and thin can't throw all that away
You've got to hang on baby don't you fade on me
Baby don't you fade on me
We've been together so long and now you're a part of me
We've been side by side through thick and thin can't throw all that away
You've got to hang on don't you fade
Baby don't make that mistake
Don't you fade on me
