

# Firewind, Perished In Flames

What brings this anger  
To kill us and lie  
Now we have hunger  
Our children will die

And they anchor  
Our strength to the ground  
And will this banker  
Steal without sound

They fought a battle  
To erase our race  
They promised death  
In a fiery place

In the middle of the night  
The siren's calling  
In the middle of the night  
Perished in flames

Now we're in danger  
We can't survive  
Locked in with strangers  
They're gonna burn us alive

They fought a battle  
To erase our race  
They promised death  
In a fiery place

In the middle of the night  
The siren's calling  
In the middle of the night  
Perished in flames

In the middle of the night  
The masses who's praying  
In the middle of the night  
The ashes in air

Can't understand the hatred  
That's been unleashed on us  
Our daily bread  
Been canceled by the press  
A crown of stolen diamonds  
Won't last forever  
Our spirit never dies  
And you'll pay the price

They fought a battle  
To erase our race  
They promised death  
In a fiery place

In the middle of the night  
The siren's calling  
In the middle of the night  
Perished in flames

-Solo-

In the middle of the night  
They're gonna burn us alive  
In the middle of the night

Whoa
