

Five Bolt Main, Made Like This

Conclusions, illusions, of mainstream intrusions

I'm saying this is just your life

Brain of the main-frame, life

Your single one and only life

I'm starting from the back again, it's never ending

Ran off the track yes once again, the vibe is sending

So far from where I might have been, this message pending

I won't stop looking back again, the road is bending

Time exists on a band 'round your wrist, and the people you trust should be last on your list

We could solve the world's problems with just one wish, we were made like this

Time exists on a band 'round your wrist, and the people you trust should be last on your list

We could solve the world's problems with just one wish, we were made like this

Made like this, made like this

I'm saying this is just your life

[Chorus]

This is just your life, I'm saying this is just your life
