

# Five Finger Death Punch, Blood And Tar

Peel away the skin behind your face  
Show me who you really are  
Underneath that broken smile you wear  
You're twisted, ugly, and bizarre (just like me)  
I'm tired of pretending that this isn't ending  
I'm not sure which side of you I fear the most  
"Enemy"  
That is the tag you gave me  
I guess that makes me  
Your favorite scar  
Enemy  
You pushed until I'm broken  
I'm what you made me  
A badge of blood and tar  
Crash and burn, you think you'd learn  
It's almost like you love the pain  
If you can't have it, then no one will  
You're narcissistic and deranged (just like me)  
There's so much deception that we've lost reception  
I'm not sure which part of you I hate the most  
"Enemy"  
That is the tag you gave me  
I guess that makes me  
Your favorite scar  
Enemy  
You pushed until I'm broken  
I'm what you made me  
A badge of blood and tar  
When we remember  
We are all mad  
The mysteries disappeared  
And life stands explained  
"Enemy"  
That is the tag you gave me  
I guess that makes me  
Your favorite scar  
Enemy  
You pushed until I'm broken  
I'm what you made me  
A badge of blood and tar
