

Fivio Foreign, Feel My Struggle

(AXL)

Feel my struggle

They gotta feel my struggle (Yeah)

Gotta feel my struggle

Yeah, look, I knew I would do it, we made history

(I knew I would do it, we made history)

I had an epiphany and I saw victory

(I had an epiphany and I saw victory)

I never responded when they starting dissing me

(I never responded when they starting dissing me)

I just started shitting, I knew they were sick of me

(I knew they were sick of me)

Look, you gotta feel my struggle

(Gotta feel my struggle)

Open case, I can't deal with no trouble

You gotta watch out, that deal might fuck you

They talk down, tryna kill my hustle

Eat good, work out, I'm tryna build my muscle

I put in too much pain, you can't heal my knuckles

They think it's over now (Think it's over now)

Like it ain't no more storm clouds (What?)

'Cause they see me on Rolling Loud

Man, I go through shit, I just hold it down

You gotta toughen up, we getting older now

When you in charge, your body get broken down

We ain't stop the drilling, we just slowing down

We were shooting and throwing at open crowds

I gave 'em motivation

The whole squad focused

I close my eyes and think God wrote this

When I say it, I do it in live motion

When I shoot, I'ma drill with my eyes open

When I'm tired of fucking, I side stroke it

(When I'm tired of fucking, I side stroke it)

Boy, I should've been careful

But I ain't really care to

I was young, dumb, and unfearful

Two, three drillers jumping in the vehicle

If that siren's loud enough, it scares you

If you talking to that gun, it hears you

Tell him shoot and he didn't come near you

You better do it if them niggas dare you

I knew I would do it, we made history

(I knew I would do it, we made history)

I had an epiphany and I saw victory

(I had an epiphany and I saw victory)

I never responded when they starting dissing me

(I never responded when they starting dissing me)

I just started shitting, I knew they were sick of me
