

Flaw, Worlds Divide

Lost in these times
It's hard to make up our minds
This is the reason we're convicted for our crimes
So we wait
Scars on our face
They show the importance of finding a way to leave this place

But then we're left with nothing substantial to hold
And I'm afraid that our stories will never be told

Some people carry on
Some just stay right where they are
Our worlds divide the sight
I'd rather move along
Knowledge is not very far
Our worlds divide the sight

When innocence dies
It tends to shake up your life
Let it consume you and then leave it all behind
I need escape
From the choices we made
And the feelings of longing that are standing in our way

Chorus 2x

Don't give up on hope
Don't give up because it's hope that binds us
Pain that guides us
Who do we trust when those things remind us
It's hope that guides us
Pain that binds us
Who do we trust when they're not behind us

Chorus

Now you are just where you belong
Our worlds divide the sight
Take us all this hope
It makes you strong
Now you are right where you belong
