

Flickerstick, Chloroform

And if I couldn't attain
All I need to explain
Would she even look me in the eye again
She sits back and ignores
My need to adore
Intimidations got me down again
She's only eighteen
But such a beautiful dream
All she needs is some chloroform and she'll be mine

(chorus)
Chloroform the one
The one that you love
And take her back

Every once in a while
I catch a strut and a smile
Maybe rejection
Is the high that keeps me coming here
I need some compassion
But she's laughing at the nervousness I feel whenever she is around
And I can't see
Just how real is the charm
No I don't mean her no harm
Despite my heart
And the challenge while she's lying here

(chorus)
So just walk on by I can see today is like any other day
But it seems brighter than it was before
I just can't believe that it's
Not the same
No it's not the same
It will never be the same for me again

(chorus)
