

# Fly To The Sky, Be With You

I can't just get you off my mind  
I just want you so bad  
My heart won't listen to me  
It follows you and goes towards you oh baby  
It beats so happily that it sinks as if it might stop  
suddenly because of the expression that you look at me with  
I never say goodbye  
Come to me now  
I love you so much oh be with you  
I wanna be with you  
How many times must I call you, how long should I yell  
before I'm able to reach your heart so that you'll turn around  
love for you  
You say that you can't trust love again because you're  
afraid of being hurt again oh baby  
You're easily influenced and fall for anyone  
I was like you and hurt a lot because I didn't know what to do  
I never say goodbye  
Come to me now  
I love you so much oh be with you  
I wanna be with you  
So that I can burn all the past memories  
and pain inside of me and forget  
love for you  
There are so many words I haven't spoken and so much love  
I haven't shown you that I feel suffocated  
I'm gonna take your love  
No matter how I try to pour it out  
I lack so much oh-feel for you  
I wanna feel for you  
There's nothing more that I wish  
than for you to come to my side  
Always be with you  
I never say goodbye  
Come to me now  
I love you so much oh be with you  
I wanna be with you  
How many times must I call you, how long should I yell  
before I'm able to reach your heart so that you'll turn around  
love for you  
I'm not sure what is you want from me  
But know the only thing I need is you  
So please won't you be mine-
