You need to stop. What's it gonna be now?
Even though you played me you're the one that I need now
Why (why) I don't even know
With the things you do to me, I should just let you go why?!

I'll never let you go, don't think that you can stray
I'll never let you go, don't think that you can stray
(There's a place I made for you inside my heart)
I'll never let you go, don't think that you can stray
(Yo love come on wit it now yea come on wit it uh!)
I'll never let you go, don't think that you can stray
