

For Squirrels, Long Live The King

Say what you're gonna say and do what you're gonna do
I can't believe what's got into you
The day is long and the night is quick
They're dying young, the poor, the rich

I am poor, I am poor, I am poor

Say what you're gonna say and do what you're gonna do
I can't believe what's got into you
The day is long and the night is quick
They're dying young, the poor, the rich

Blood from a stone, blood from a stone, blood from a stone

Stone, stone, stone

Something special, something nice
Something pretty will suffice
Something simple, something right
Something special, something, life

Say what you're gonna say and do what you're gonna do
I can't believe what's got into you
The day is long and the night is quick
They're dying young, the poor, the rich

Long live the king, long live the king, long live the king

King, king, king

Something special, something nice
Something pretty shall suffice
Something simple, something right
Something special, something, life

I love you (x5)
