

# Foster The People, Pay The Man

What you mean

/4x

What you see

/2x

Oh, no!

Well I need a little something

TO pull my head off

/2x

Need a little something

Because I've been running from the truth

Will never lose

Lies come from loose teeth

Thed to the nose

Climbing up my own tree

Hoping it can hold all the things

I've seen but I've chosen to ignore

Well, I said

Well, I believe

I've been well fed, yeah

But the wolf's not dead

Say what you love

It's alright

Don't be afraid to find the light

Embrace the day like night

We hear the fire

We all go wild again!

Do you have the name of someone I love

You said, just keep it true

Lift up your name

Seasons change

You know till it'll never never be the same

We;'ll see the Sun again

Before it fades I just wanna day that I love you!

Pay the man /2x

Got to pay the man

Run as fast as you can

Call out to God

Praise to the Most High

Call out for help

Cause I;m playing with fire

Call out to the mountains

Till my voice goes faint

Echoes through time then goes back with new strength

And when It's raining

We're sailing /3x

I'm off the leash

I go for war fior peace

Must have been touching everything that I can

I've got blood on my hands

Guess I'm going deaf

With cry of this sin

Please forgive me

I don't understand

We be believe we've been well fed

The deaf man heard

What the mute man said

Then they all followed where blind men led

Say what you love  
It's alright  
Don't be afraid to find the light  
Embrace the day like night  
We hear the fire  
We all go wild again!  
Do you have the name of someone I love  
You said, just keep it true  
Lift up your name  
Seasons change  
You know till it'll never never be the same  
We;'ll see the Sun again  
Before it fades I just wanna day that I love you!
