

Fozzy, Crucify Yourself

Staring at the sun
Dreaming I'm someone else
My mind's a smoking gun
A silent scream for some help
And it goes on
and on the crying
Never ends
And it goes on and on and on

Chorus:
You walk like a dead man
And you talk like a dead man
You walk like a dead man
And you talk like a dead man
And you crucify yourself

Unraveling at the seams
Sanity waves goodbye
Doubting my beliefs
Hope and love is a lie
And it goes on
and on the voices
Never end
And it goes on and on and on

Chorus
Guitar Solo
A heart that's black and cold
Poisoning the blood
every moment
Rotting decaying
Too numb to live with it

Chorus
The wings of tomorrow
And our faith
will bring us change
The wings of tomorrow
And our faith
Will bring us change
