

Fra Lippo Lippi, Angel

Everybody sit down and listen
Wanna tell you what you've been missing
Secrets, big big secrets

Angel came out of nowhere
And vanish without a warning
Angel, like and angel

Chorus:
And when she moves
The way she glides across the room
Just like an angel
I wish that i could see her one more time
And when she moves
The way she glides across the room
Just like an angel
I wish that i could see her one more time

She plays a game of longing
See the place some big time living
City, big big city

That everytime i come back here
And fell the smell of country air
Its heaven, my own heaven

Repeat Chorus

Instrumental

Repeat Chorus twice till fade

Cha
