

Framing Hanley, All In Your Hands

The guts it's taken you
Just to say what you mean
Let's do this right tonight
'cause there's no in-between

The self deprecation of what you put your faith in
Has brought you to your knees
You're waiting at the starting line
What if the gun is empty?

Run
Leave it all and run
Just run
It's all in your hands all in your hands
It's all in your hands all in your hands

The questions never asked
You'll never find the answer
Waiting for the truth
Could become your cancer

That could form in ways in this tragic way
Have this stage set for a great ending
We're miles from the finish line
Is your heart worth defending?

Run
Leave it all and run
Just run
It's all in your hands all in your hands
It's all in your hands all in your hands

We've taken this for way too long
We're taking this tonight

Leave it all and run
It's all in your hands all in your hands
It's all in your hands all in your hands

We're taking this alive we're taking this alive
You're standing at the finish line
We're taking this alive we're taking this alive
Leave it all and run
