

# Frank Barile, Never Fall

It's the second time it happened  
The time on your bed  
Your hand on my hair  
My hand on your head

And I can close my eyes when you're around  
And I can hold my breath when you're around  
And I can tell you all when you're around  
And I can never fall when you're around

And if we can stick to each other  
Then we can never  
We can never fall

You close your eyes again  
But the night it never ends  
You fall asleep again  
But the night it never ends

And I can close my eyes when you're around  
And I can hold my breath when you're around  
And I can tell you all when you're around

And I can never fall when you're around

And if we can stick to each other  
Then we can never  
We can never fall  
Never fall

Now I can finally smile  
And I know that I can mean it  
And I can really smile  
And I know that you can see it

And I can close my eyes when you're around  
And I can hold my breath when you're around  
And I can tell you all when you're around  
And I can never fall when you're around

And if we can stick to each other  
Then we can never  
We can never fall  
We can never fall
