

Freddie Hart, Moon Girl

One dark night as I drove along wasn't really going nowhere
My eyes caught something on outside of the road black stockings and snow white hair
Well I stopped the car I opened the door I said want a ride little girl
She got right in and she sat right down she was something out of this world

Oh I'm the moon girl that's what she said I come from out of the blue
I'm the moon girl that's what she said I come all the way down to see you

The cutiest and thinnest through from my head a figure was sack it to no one
Her big blue eyes they hypnotized everything rolled it to one
All the things that went through my head is she real or is it a dream
Imagined myself been married to her with a house full of little moonbeans
Oh I'm the moon girl...

She said oh man now please understand if sunshine's on me I'll die
In her little space ship took off on a trip through tears of regret she said bye
Oh but they just said a date for me at the Cape and I know that I'll see her soon
Cause I'm the volunteer and I'm leaving here I'll be the very first man on the Moon
Oh I'm the moon girl...
I come all the way down to see you I come all the way down to see you
