

Freddie Hart, One More Mountain To Climb

For every woman there is a man for every man there is a girl
And there's enough for everyone to get a little taste of love
We're all born with troubles that's the sins of menkind
From the first breath life has been just one more mountain to climb
So get up get movin' everybody there's one more mountain to climb
When we get movin' there'll be one more valley behind
When we reach the top of the mountain the sun is gonna shine
So get up get movin' get goin' everybody there's one more mountain to climb
[piano]
Remember life's the precious thing and we walk on sacred ground
No matter what your problems are there'll be bigger ones around
Remember how the man complained his shoes were much too small
Until he saw the man who didn't have no feet at all
So get up get movin'...
So get up get movin' get goin' everybody there's one more mountain to climb
So get up get movin' get goin' everybody there's one more mountain to climb
