

Freddie Hart, Prescription For Happiness

You're my morning cup of coffee you start my day off right
Love fills my life completely you satisfy my appetite
Every day's a new adventure I'm never bored with loneliness
You're my prescription for happiness

You're my every inspiration the woman behind her man
And life if I'm successful will be by your helping hand
And I really know you love from the passion in your kiss
You're my prescription for happiness
And I really know you love...
