

# Freddie Hart, We'll Haunt You Just Like Ghosts

Please listen I'm your conscience talking and I won't lie to you  
We're good friends your heart and I and we know what's best for you  
You love her but if you hurt her with the ones you'll hurt the most  
So take warnin' now don't you leave her or we'll haunt you just like ghosts

So there were others before you because of pride she lied to you  
Oh but a love for you is true and I don't see no wings on you  
And you love her but if you hurt her with the ones you'll hurt the most  
So take warnin' now don't you leave her or we'll haunt you just like ghosts  
Yes there were others before you...
