I'm seraph. I'm snake.  
controlled. pre-programmed entrapped soul.  
extraneous powers conditions my mind.  
I'm vermin. I'm fake.  
causality ignores the persecutory illusions of free will.  
morality justifies no cause.  
beyond reason: we eat. reproduce and die.  
a genetically conditioned psychomotor machine.  
I'm seraph. I'm snake. an evolutionary mistake.
