

# Freestyle, It's Automatic

Chorus:

It's automatic

It's automatic

It's automatic

It's automatic

Girl I can see right through your false defenses

You act as if you can ignore the sound

My force detectors tell me your pretending

All of your systems are about to go down

No need to panic, I know you feel it

If you can stand it, just dance

I'm your mechanic, I know you feel it

This automatic romance

Chorus

I know the secrets to your circuitry girl

To your diskette I have to access code

Don't try to fight this electricity girl

From all this power you might overload

No need to panic, I know you feel it

If you can stand it, just dance

I'm your mechanic, I know you feel it

This automatic romance

Chorus

Girl I can see right through your false defenses

Before you know it, I will be in control

My force detectors tell me your pretending

Your force repellers can no longer hold

No need to panic, I know you feel it

If you can stand it, just dance

I'm your mechanic, I know you feel it

This automatic romance

Chorus 2x

It's automatic baby

It's automatic

I realize baby

All the things you fantasize baby

It's in your eyes baby

So let your body rock

Shake that thing

I'll make you wet baby

I'll make you sweat baby

I'm your best bet baby

So let your body rock

I know you feel it, just dance

I know you feel it, romance

Chorus 2x

I know you feel it, romance

I know you feel it, just dance

No need to panic, I know you feel it

This automatic romance

It's automatic, I know you feel it
